## **Did You Know Parker Place**

### **Offers “Closer Care” program for seniors with Alzheimer’s/dementia?**

Our Program is designed to provide our residents a secure environment while meeting the needs of daily living activities and services.

This is an all-inclusive program which is monitored by a “sentury system” which alerts staff through a pager when the resident has left their apartment. All personal and health services needed are also included to provide quality of life, while maintaining residents’ privacy and dignity.

Our staff has been trained to provide specialized, caring services in working with residents with Alzheimer’s and/or Dementia.
