

PARKER PLACE

RETIREMENT COMMUNITY

Did You Know Parker Place Can provide Hospice Services?

Parker Place can provide end of life services in our Assisted Living setting to your patients who may need hospice services. Parker Place works closely with Hospice providers to provide caring services in a home-like environment.

Our RN will work closely with Hospice to coordinate services and care. Prior to move-in our RN will meet individually with each prospective resident to determine service needs through our assessment process in order to ensure continuity of care, as well as meeting the criteria for Assisted Living.
